TESTIMONIALS

Recently got a new puppy, first time ever with one and frankly I did not know where to begin. Reading Forever Home, helped me find a beginning place to begin training my young lab mix. As the book suggests all of his bad behaviors where in fact due to the way we were treating the dog. As soon as I began reading the book I began implementing his sit strategy and that alone has proven to be the most effective tool possible. Three weeks after following the program and working on training my little guy is well behaved and pleasant to be around. This book was also very easy to follow and read. I highly refer this book to anyone who needs to train or re-train their dogs!

Mike is not only an excellent dog trainer — he has a heart of gold. His positive attitude and commitment to helping the Humane Society's pets has been fantastic. He likes to work with our "hard to place" dogs to train and socialize them. He understands these dogs in a very special way and has made great strides in teaching them how to behave and channel their energies in a positive way.
